\$4000.00 + [(Total construction cost - \$2,000,000) X .0009] = insurance cost

Commercial Plan Reviews

Commercial Plan review fees are calculated according to the ICC Valuation Service or actual cost of construction as follows:

**Estimated Construction Value \$ 0. to \$ 1,250,000. = Construction value X .0015
(\$150 Minimum)**

Estimated Construction Value \$ 1,250,000. to \$ 5,000,000. = \$1,875. + (.0005 X construction value over \$1,250,000.)

Estimated Construction Value over \$5,000,000. = \$3,750. + (.0004 X construction value over \$5,000,000.)

Plan review for mechanical, plumbing, electrical, energy, accessibility and fire protection is computed at 25% of the building plan review fee for each discipline. (\$150 minimum)

Special pricing may be given to buildings such as warehouses due to their relative simplicity or structures with repetitive features such as high rise buildings

Plan reviews covering the requirements of mechanical and plumbing codes are available, each for a fee of 25% of the applicable building code review fee. Plan reviews for the requirements of the electrical code shall be provided at a fee of 35% of the applicable building code review fee, excluding reviews for any use included in the (Institutional) use group classification. Reviews done for the excluded use classification shall be based upon the degree of complexity

A preliminary plan review is available for a fee of 50% of the full plan review fee cost. Preliminary plan review addresses such code requirements as: use and occupancy classification, type of construction, height and area calculations, means of egress, and fire restrictive construction requirements.

The preliminary plan review fee shall be credited towards the cost of a complete building code plan review conducted by Commonwealth Code Inspection Service, Inc.
