Jacobus, PA 17047

Dear Current Resident,

During the week of July 2, 2018 Stewart & Tate Construction, Inc. will be completing an asphalt surface treatment to N. pleasant Avenue and Smith Street. During this time, signs will be in place instructing residents to remain off the roadway while the treatment is curing, this process typically does not extend beyond the workday itself (7am – 5pm). You will still have access to your residence during this time, however you will be liable for any damage to the roadway and/or your vehicle. Please allow time for the treatment to fully cure before you notice an improvement in the road and your ride.

This initial surfacing treatment will be applied during two phases followed by an additional surfacing treatment. The treatment is a cost-effective method to improve the longevity and skid resistance of the roadway.

Please contact Stewart & Tate Construction at 717-854-9581 if you have any questions.
